## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 37-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gammon (US Patent #5,682,701) in view of Gill (US Patent 2,027,225).

Gammon teaches in the figures most of the elements of the claimed invention. However, Gammon fails to teach a plurality of inflatable life-sized humanoid figures having unique appearances. Gil teaches in the figures, the concept of a plurality of inflatable toys having unique appearances. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a plurality of unique appearance inflatable figures as taught by Gil for the system of Gammon for the purpose of providing different appearances when viewing the system. Further, it would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate a plurality of inflatable life-sized humanoid figures, since it has been held that mere duplication of the essential working parts of a device involves only routine skill in the art. *St. Regis Paper Co. v. Bemis Col*, 193 USPQ 8. It should be noted that the Examiner takes the position that the device of Gammon is capable of performing the required functional recitations of the claims.

***Allowable Subject Matter***

Claims 29-36 are allowed.
